

Position Announcement - AA2379

Organization: Interdisciplinary Arts and Sciences Program / UW Bothell

Title: Assistant Professor

Search #: AA2379

Position Details

Geographic Analysis and Visualization – Assistant Professor, tenure track (one full-time position). The Interdisciplinary Arts and Sciences Program (IAS) at the University of Washington Bothell (UWB) seeks a dynamic educator who can integrate teaching, research, and practice in geographic analysis and representation, including GIS, across diverse fields of study. Possible areas of expertise include: Environmental Science and Natural Resources; Community Studies and Participatory Mapping; Human Landscapes; and Planning and Policy.

The successful candidate will join an interdisciplinary faculty working across the arts, humanities and social, and natural sciences in an integrative curriculum that emphasizes fieldwork and community-based scholarship and pedagogy. Two-years teaching experience and PhD required at time of appointment. Salary is commensurate with qualifications and experience.

IAS houses undergraduate and graduate programs, is part of a growing campus located 18 miles from Seattle on the eastside of Lake Washington, and provides faculty with access to the research and funding resources of the UW as a whole.

IAS has recently launched several new undergraduate majors, including a degree in Science, Technology, and Society. It also offers Master of Arts degrees in Cultural Studies and Policy Studies. The program as a whole stresses links between diverse fields and methods of inquiry, and values engaged scholarship and experiential learning as central components of its mission. The candidate will have a demonstrated commitment to pedagogical innovation and be prepared to teach an upper-division core course that introduces students to interdisciplinary inquiry. Successful candidates must also have a demonstrated commitment to working with diverse student and community populations. For more information about IAS, UWB, and the

position, go to <http://www.uwb.edu/IAS/>, or e-mail the search committee chair, Professor David Stokes, at dstokes@uwb.edu.

Preferred deadline: 23 October 2009. Applications should include a letter addressing the candidate's scholarly and pedagogical qualifications for working in this type of program, a CV, a statement of research and teaching interests, and a sample syllabus from an interdisciplinary course. Address applications to Ms. Pam DePriest, Geographic Analysis and Visualization Search, University of Washington Bothell, Box 358530, 18115 Campus Way NE, Bothell, WA 98011.

This position is contingent upon available funding. University of Washington faculty members engage in teaching, research and service. The University is an affirmative action, equal opportunity employer. The Interdisciplinary Arts and Sciences Program is dedicated to the goal of building a culturally diverse and pluralistic faculty and staff committed to teaching and working in a multicultural environment and strongly encourages applications from women, minorities, individuals with disabilities and other eligible veterans. We are particularly interested in faculty who contribute to diversifying the undergraduate and graduate curricula. If you have a question about the details of this search / position please contact the hiring unit directly. Thank you for your interest in this position at the University of Washington.
